https://ca.linkedin.com/in/nikharbhavsar | https://nikbhavsar.github.io/

A passionate and driven software developer with years of programming experience with Front End Development. Utilized knowledge of and interest in Android and Java to develop apps in google play store, leading to career progression with web-based technologies such as ES6, React, Angular4 and MEAN Stack. Recognized as a quietly confident, naturally curious, and perpetually improving professional, leader, and team contributor, comfortable engaging at all levels of the software development stack.

CORE SKILLS & COMPETENCIES

- Android Development
- Java Programming
- Cross Browser Combability
- Angular

- Web Development
- Code QA & Optimization
- CMS Platforms
- React

- Site Troubleshooting
- Problem Solving
- Team Coordination
- ES6

EDUCATION & CERTIFICATIONS

Software Engineering Technology, Advanced Diploma | Centennial College | *Toronto, ON* | 2014 – 2016

Academic Projects:

Collage Photo Editor: *The Collage Photo Editor project encompassed development using Android and Universal Image Loader library. End-results allowed users to choose different templates to make their own collage photo.*

Search Faculty: *Search Faculty was an online job portal developed in PHP and MySQL. The app was designed to connect employers and employees; once an employer or employee registers with the online portal, employees can use the app to search for specific jobs they want, while employers can search through employees for particular sets of skills they require.*

Bachelor of Computer Engineering | Gujarat Technological University | *Ahmedabad, India* | 2009 – 2013

Certifications:

- Achieved **Sitecore Professional Developer** Certification
- Achieved **Hackathon** Certificate for completing workshop held by Centennial College

TECHNICAL PROFICIENCIES

Languages: HTML5 – CSS3 – JavaScript – JQuery – ES6 – React – Angular - Node.js – PHP – Android – Java – JSP – Servlet
Tools: GIT – Visual Studio Code – Eclipse – Android Studio
Application Server: Tomcat – WAMP – Wildfly
Database Systems: SQLite – MongoDB – MySQL – Firebase
Other Skills: Bootstrap – Redux – Webpack – npm – yarn – SCSS – REST API – JSON –MEAN Stack – Asana – Sitecore – YouTrack

CAREER OVERVIEW

VOLUNTEER SOFTWARE DEVELOPER   **NOV 2017 – FEB 2018**
Trellis.org
Kelowna, BC

Notable Responsibilities:

- Created optimized landing page using HTML5 , CSS and Angular.

- Converted the Angular Component's styling from Typebase to Bootstrap
- Conducted product testing and reported any issues using YouTrack

JUNIOR DEVELOPER   **FEB 2018 – JUL 2018**
Biznas Innovations Inc.
Kelowna, BC

Notable Responsibilities:

- Maintained client's websites and enhanced visitor experience through additional and optimized features
- Solved issues related to cookies, GTM and 301 Redirects
- Garnered experience working with Sitecore CMS

JAVA DEVELOPER   **2012-2013**
MindArray System Pvt. Ltd.
Ahmedabad, India

Notable Responsibilities:

- **Worked in a co-op position developing a website alongside a team of 3 additional developers.** Planned out a program for online budget tracking using JSP, MySQL, HTML, and CSS. Met with the team to set deadlines and identify goals and milestones. Analyzed and developed UML diagrams for the system and converted functional requirements into logical code.

- **Assisted in performing research for the project, crafting work diagrams, writing Java code, and servlets.** The program was designed to track the user's budget based on income and expenses. Users could manually enter their details manually to gather their monthly or weekly budget in a report or graphical form. Performed QA and code review and optimized code as needed.

Independent Projects:

Easy Notes

- Developed and published an app that allowed users to manage their notes and quickly jot down their passwords easily. Users were able to add and store notes on their phone, complete with titles, notes could then be shared through other applications like WhatsApp, text, and other messaging apps.

- Developed an app on the Android platform using Java programming. Examined competitors in the field to see how they laid out their UI and what features were offered. Identified which features worked and targeted them for Easy Notes. Wrote the app out on paper first before completing the layout on an XML diagram then developed the code.

Expense Calculator

- The expense calculator app allows users to track their expense easily. Users can filter their expense using the Date, Amount and Text filters which are great features available in the app. The app is using the three main technologies for its technology stack, which is **React, Redux and Firebase**.
